Interactive audio-tactile maps for visually impaired people - sigaccess International directory of tactile map collections. Frank Kurt Cylke, Judith M. Dixon, managing editors. Section of Libraries for the Blind, International Federation of Library Associations and Institutions. The Hague, BATS: The Blind Audio Tactile Mapping System - CiteSeerX International directory of tactile map collections is an important reference for blind and visually impaired people. It includes a collection of raised relief maps, useful for understanding geographical features and orientations. The directory is maintained by Frank Kurt Cylke and Judith M. Dixon. The International Directory of Tactile Map Collections was prepared in 1985 and is available online, from a collection of over 2,500 diagrams prepared for Purdue University students. Tactile maps are an essential tool for visually impaired individuals, allowing them to access and understand information that is not available in Braille or other formats. The directory is available on Amazon.com and is updated regularly to reflect new developments in tactile mapping technology. Tactile maps are a valuable resource for educators, researchers, and organizations working with the visually impaired. They provide a unique and effective way to convey information and promote access to knowledge for everyone.
