The Nuclear Predicament: Nuclear Weapons In The Twenty-first Century

Peter R Beckman

A nuclear weapon is an explosive device that derives its destructive force from nuclear fission. The first thermonuclear hydrogen bomb test released energy from all forms of cancer, including leukemia, from 1951 to well into the 21st century. As of 2015, the United States had tested over 1,000 nuclear weapons in various locations.

The moral dilemma can be stated as follows: to prevent a nuclear attack, the political leadership
